

Second year MSBTM students are eligible to receive up to \$500 to reimburse relevant professional development activities. Items reimbursed in the past include conference attendance, participation in online courses with or without certification (business analytics, data analytics, etc), biotech/business society membership, and attendance at networking events run by relevant professional society. To receive reimbursement, the activity should be endorsed by your Merage career counselor or your research mentor. The proposed activity with the endorsement should be sent to the MSBTM Program Director for approval. Once approved, reimbursement requests should be processed through BioSci Finance at biosci-reimbursement@uci.edu.
