

MBB Research- Mol Bio 200 syllabus:

For each quarter, graduate students must adhere to specified research objectives and academic goals. To ensure compliance, the mentor/PI and student must discuss research plans and academic goals, and the student will complete this form (~0.5-1 page in length) and email it to the mentor/PI at the beginning of each quarter. Once finalized between the student and the mentor/PI, these research plans need then to be uploaded to the google form by the student. The Graduate Student advisors will follow-up with any students who are not in compliance.

Name:

Advisor:

Quarter:

Research Objectives:

Main Hypothesis and/or Goals for the Quarter:

Outline

- 1) experimental plans which include data analyses and lab notebook compliance.
